Good Program Sports at Box Springs Picnic

ANNUAL EVENT WAS GREAT SUCCESS; GOOD WEATHER AND GOOD CROWD—F. ANDERSON MEETS WITH ACCIDENA DURING AFTERNOON

Box Springs district maintained its picnic reputation at the annual picnic held n that locality last Saturday. From every standpoint the event was a great success, and those in charge are deserving of great praise for the able manner in which the day's program was conducted.

The ideal spot for a picnic outing and the previous record of this annual event was no doubt responsible for the large crowd which attended, and none came away disappointed.

A good programme of athletic events, horse races, etc., was provided, and there was keen competition in every event. As the weather was ideal the refreshment booth was well patronized. For the dance in the evening the U.F.A. hall was taxed to its utmost to accommodate the crowd, which is said to have been one of the largest in the history of the district.

During the afternoon an unfortunate accident occurred as a result of which Fred Anderson, of that district, is now in the Medicine Hat hospital. Anderson was riding a horse which reared up and fell over on top of him, the pommel of the saddle striking him on the chest and breaking several ribs. The latest report from the hospital is to the effect that he is out of danger and is now progressing favorably.

The following is a list of the prize winners in the different events:

Girls' Walking Race—M. Jackman, J. Shellmar.

Girls' Three-legged Race—M. Davidson and L. McDermott, M. Butterman and M. Belisle.

Ladies' Race—M. Daker, M. Jackman.

Boys' Race—F. Barnett, R. Nelson.

Girls, under 8—H. Rose, C. Shellmar.

Boys, 12 and under—J. Sutterland, E. Barclay.

Girls, 12 and under—T. Shellmar, F. Rose.

Boys, 16 and under—E. Womersley, W. Dixon.

Ladies', open—J. Shellmar, L. McDermott.

Boys and Girls, under 6—M. Shellmar, Rose Shellmar.

Boys' Three-legged—R. Bergeron, B. Burke.

Girls, 16—J. Shellmar, L. McDermott.

HORSE RACES.

Quarter Mile, Boys and Girls—M. Williamson, N. Dixon.

Boot and Shoe—R. Page, F. Belisle.

Half Mile—Effie Sneath, M. Davidson.

Quarter Mile, open—M. Williamson, E. Sneath.

Quarter MiMle, 12 years—L. Williamson, N. Dixon.

Potato Race—H. Baker, R. Page.

Quarter Mile, Ladies'—E. Sneath, M. Davidson.

Quarter Mile Relay—M. Williamson, M. Davidson.

Cow Horse Race—R. Page, W. Lindsay.

Bucking Contest—R. Page, V. Lawrence.

Lord Byng Pays Bowell a Visit

(From Our Own Correspondent).

Lord and Lady Byng honored Bowell with a visit last week. The train carrying the vice-regal party was switched off on a siding as the Governor General wished to have a quiet rest for a few days. On their arrival here they were welcomed by a few cowboys. The boys were invited to look through the train and were also invited to supper.

The rain that fell in this district was greatly needed, and was heartily welcomed. It has increased the prospect of a crop very much.

The cutting and stacking of rye for feed is practically finished round here.

The Durum wheat is doing fine, and has stood the drought in excellent shape, states Mr. Erickson.

Everybody is talking picnic these days.

L. P. Ericksen left here on Saturday to join the A.M.R., and goes to camp with them at the fair ground in Medicine Hat.

First Shoot Held Rifle Range Saturday

The first shoot at the rifle range was held last Saturday morning. There were about a dozen members of the association present, and all displayed such keen enthusiasm on the range that there is no doubt now that this will be a popular pastime this summer. Despite the fact that this was the first shoot some good scoring was done, among which were several bull's eyes.

H. Champ, one of the enthusiastic members, has signified his intention of putting up a prize for competition. Arrangements for this will be made at the next shoot.

A memorial tower has been built on Thiepval ridge, in France, to commemorate the 5,000 Irish soldiers who fell in the battle of the Somme.

Lord and Lady Byng on their Way Across Canada

Upon their arrival in Winnipeg, during their Western tour, Lord Byng and his party posed for a battery of camera-men in front of the Governor's private car at the C. P. R. Station. In this group are, left to right—Capt. the Hon. S. W. Erskine, Mr. E. H. Coleman, secretary to the Lieutenant-Governor, Col. Godson-Godson, Mr. Justice Perdue, Lady Aikins, Lady Margaret Boscawen, Baron Byng, Major the Hon. H. J. W. Jolliffe, Lady Byng, Hon. T. C. Norris, Premier of Manitoba, Sir James Aikins, Lieutenant-Governor of Manitoba, General H. B. D. Ketchen, and Acting Mayor Fowler.

Local Merchants To Close Stores Half Day a Week

WEDNESDAY IS DAY DECIDED ON—WILL START ON JULY 12—ALSO FORM LOCAL RETAIL MERCHANTS' ASSOCIATION

Last Tuesday evening a number of merchants in town met at the town hall to discuss the question of closing the stores one afternoon a week during the summer months.

G. Dunnett was selected chairman of the meeting, and W. Campeau secretary. It was explained that a petition had been presented to the council asking that a bylaw for such a holiday, be passed.

After some discussion it was decided to try the half holiday for the balance of this season without asking the counci lto pass the bylaw covering same.

It was also decided to ask all proprietors of ice cream parlors, sigar stores and restaurants to refrain from selling groceries and other staple articles during the afternoon that other stores are closed.

Wednesday afternoon was the day chosen to close, and it was decided to start next Wednesday, July 12th.

After disposing of this business it was decided to form a permanent local Retail Merchants' Association, the same to meet regularly once a month. The same officers were elected, and the next meeting will be held on Tuesday evening, August 1st.

FARMERS MEAN TO HAVE WHEAT BOARD, SAYS WOOD

The farmers of Alberta are determined to get a practical wheat board and if it does not come from a federal source it must come in a provincial way, H. W. Wood, president of the U.F.A., said following his return from a visit to a score of U.F.A. locals in the Edmonton district.

"I have not had an opportunity of looking into the reports of what has been done in Ottawa as yet," said Mr. Wood, "but I will do so as soon as I can. In the meantime, however, we feel that a wheat board is imperative and we must have it."

Bowell U.F.A. Picnic Wednesday, July 12

Bowell U.F.A. and W.A. will hold a big picnic on Wednesday, July 12th. There will be a good afternoon's programme of all kinds of sports. There will also be provision made for refreshment booths on the grounds, and a good day's outing is assured.

In the evening there will be an entertainment in the Bowell school, when the boys from Redcliff will put on a play, and there will also be a good musical programme rendered.

Everybody is invited to join in this picnic. As this is the first day of the half holiday in Redcliff there should be a large turnout from town.

BUFFALO LOCAL HOLDS COMMUNITY PICNIC

Buffalo U.F.A. held a community picnic at the river three miles north of Buffalo on June 16th. The chief events of the day were a baseball match between the married and single men and a ladies' tug-of-war.

The U.F.A. met in Buffalo hall on June 24th, and appointed a committee and a foreman to look after the road work.

Review advertising is good business.

CONCERT AT BOWELL, WEDNESDAY, JULY 12

Every farmer and person in the district will find it of interest to be at Bowell on Wednesday, July 12th. The boys of the 'Teen Age Class of Gordon Memorial Sunday School, Redcliff, will put on their popular play entitled "Turn Him Out." The play will be put on under the auspices of the Bowell U.F.A. There will also be other items, such as songs and recitations, and everybody is assured of a good time. Bowell will be the place to visit on the 12th. Admission 35 cents.

Success Local Has Successful Picnic

Success U.F.A. local held a most successful picnic at Bernice. There was a large crowd in attendance from the surrounding country and all thoroughly enjoyed the excellent program of sports.

In one of the horse races during the afternoon Roy Berss met with an accident, as a result of which he broke his collar bone.

W. C. Smith, M.P.P. for this constituency, addressed the gathering in the evening. In his remarks he dealt more particularly with the terms and workings of the Relief Act, and explained many points upon which the public was not quite clear.

In the evening the hall was well filled for the dance. Here Tigloff Bros., of Many Island, furnished the music for the occasion and one of the jolliest dance sof the season was held.

WEDDINGS

HURLBERT—BENNETT

The marriage took place at the home of the groom's parents on Third street, on Saturday afternoon, July 1st, of Marion Francis Hurlbert and Alta Marion Bennett, both of Redcliff. The ceremony was performed by Rev. T. S. Paton. Mr. and Mrs. Hurlbert will make their home in Redcliff

GOESON—FUNDERBURGH

At 414, First street, Medicine Hat, a quiet wedding was solemnized, July 4th, when Mr. Ben E. Goeson, of Brutus, Alta., was united in the bonds of holw matrimony to Miss Edna M. Funderburgh, of Kansas, U.S.A. The ceremony was performed by Rev. J. W. Morrow, M.A., LL.B.

Community Picnic at C. R. Mitchell's Ranch

A community picnic will be held on C. R. Mitchell's ranch on Saturday, July 8th. Four schools of the district are taking part and will put on a programme during the day. There will also be a good programme of athletic sports, for which good prizes are offered. Refreshment booth on the grounds.

BAD HAIL STORM SOUTH MANYBERRIES

A bad hail storm passed over the district southwest of Manyberries yesterday. There was total destruction of crop in a path five miles wide. Blocks of ice as large as the fist were common. Several persons caught in the fields were seriously but not dangerously injured. The storm kept to the north of the Comrey country.

Canon Hicks to Visit Redcliff Next Sunday

WILL CONDUCT SERVICE IN ST. AMBROSE CHURCH NEXT SUNDAY EVENING—VISITOR HAS A DISTINGUISHED CAREER AND SHOULD DRAW LARGE CONGREGATION

Next Sunday Redcliff is to be honored with a visit from Canon Hicks, a most distinguished official of the Church of England.

In connection with this visit we reprint the following extract from a letter from the Bishop of Qu-Appelle to the clergy and laity of his diocese, regarding the work of the Rev. Canon Hicks, of Lincoln Cathedral, England:

During the Great War I believe Canon Hicks addressed on an average 3,000 men a day, and his name was a household word in hundreds of camps whoes men were drilled and traine for service and also at the front. Bishop King spoke of him as one of the most wonderful men in England.

Since the conclusion of the war has visited Jerusalem and the East indeed he curtailed his visit in Asia in order that he might be in Qu'Appelle Diocese for the Synod and serve the Church on the Prairie by conducting short missions, preaching, etc. during May, June and July.

I am sure I may ask from both the clergy and laity of the Diocese a hearty welcome and earnest co-operation in the work he has consented to undertake in the various parishes, and missions the Bishop has asked him to visit this summer.

Canon Hicks will conduct the service in St. Ambrose church here next Sunday evening. There should be a large turnout to hear this distinguished visitor.

District Deputies For the Relief Act

Deputy commissioners under the southern Alberta Relief Act, to act with Commissioner E. J. Fream in the five districts in to which the drought area has been divided, have been appointe and are now assisting in the administration of the act.

The appointments are as follows—For District No. 1, comprising all that part of the drought area lying within the boundaries of the judicial district of Taber, Thomas Martin; District No. 2, in the judicial district of Medicine Hat, S. A. Wallace; District No. 3, in the judicial district of Lethbridge, S. S. Dunham; District No. 4, in the judicial district of Maclead, Judge A. M. MacDonald; District No. 5, in the judicial district of Stettler, Judge R. J. S. Stewart.

The five deputy commissioners are "to assist and to act instead of the cofmissioner in such matters as may be delegated to them by the commissioner."

SHOPMEN IN CANADA RESISTING TERMS

James Somerville, international vice president of the Machinists' Union, who has returned to Moose Jaw from a tour of the Canadian railways from Montreal to Vancouver, declared that shopmen throughout Canada are prepared to go on strike if railway companies persist in their attempt to impose the terms announced during May upon the men.

We give the same attention to Job Printing orders, whether large or small

Reduction of Rates On Railways to Take Effect on August 1st

HAS BEEN ORDERED BY THE RAILWAY COMMISSION — REDUCTION AFFECTS ALL BASIC COMMODITIES SUCH AS BUILDING MATERIAL, FOREST AND MINERAL PRODUCTS

A reduction of seven and one-half percent in the railway rates on basic commodities to become effective August 1, has been ordered by the board of railway commissioners. The decrease reduces the increase of September, 1920, to 12½ percent in western Canada and 17½ percent in eastern Canada. The original increase ordered by the board in 1920 was 40 per cent in the east and 35 per cent in the west. Subsequent reductions brought these figures down to 25 percent in the east and 20 percent in the west.

The present decrease applies to forest products, building material, brick cement, lime, and plaster, potatoes, fertilizers other than chemicals, ores, pig iron, blooms and billets, wire rods and scrap iron. Grain and flour rates were fixed by parliament during the session just closed in accordance with the rates prevailing under the Crow's Nest Pass agreement.

The judgment rescinds all increases provided for in September, 1920, on coal, other than anthracite and coal from the head of the lakes westward. The principle of arbitraries from the maritime provinces to all points west of Port Arthur has been approved, the St. John arbitrary being 24 cents per 100 pounds first class and 12 cents fifth class. The board has no purisdistion of the Canadian government railways and no directions were made regarding that system. These arbitraries do not apply to traffic between the maritime provinces and Montreal or to points west of Montreal and [illegible] of Fort William.

Schedule (a) rates, which means the general rate basis throughout Quebec and Ontario, are extended to include the territory betwen North Bay and Stula Ste. Marie. The increase in rates on excess baggage provided for in September, 1920, has been eliminated.

The mountain rate scale in British Columbia has been reduced to a basis of one mile in British Columbia to one and a quarter miles in the prairies, the former basis having been one to one and one-half miles. This means that the difference between the mountain and prairie scales have been cut in two. Reductions are provided for grain and grain products going to British Columbia for domestic use amounting on an average to about ten per cent.

With these exceptions all other rates are continued as at present existing.

The board did not find any unjust discrimination against the west as compared with the east.

WARNING

People who are in the habit of going to the river south of town are warned to watch for the red flags at the rifle range. When these flags are out the range is being used, and the appearance of the flags should be a warning to keep off the range entirely.

Alta. and Sask. Working On Wheat Board

TWO PREMIERS NOW IN COMMUNICATION — EASTERN PROVINCES NOT INTERESTED — MANITOBA CAN DO NOTHING TILL AFTER ELECTION

The fate of the wheat board for this season rests in the hands of two men, who will come to some decision inthe next few days. As there is much detail in connection with the legislation and the organization after the legislation, it is doubtfir even now if the board can be organized this year. The act passed by the Dominion parliament provided that it would come into operation on legislation being passed by two provinces. Eastern provinces are not interested. Because of the election Manitoba will take no action. It is suspected that Premier Dunning is not as enthusiastic over the legislation as Premier Greenfield.

Premier Greenfield announced yesterday that he was in communication with Premier Dunning, and expected an answer whether Saskatchewan would come to Alberta or Alberta to Saskatchewan. He did not get an answer, however, and no definite meeting had been arranged.

Some of the Dominion members of parliament ar ebringing pressure upon the government ,and pointing out that there is no time to lose. The act provides that the legislation passed must be satisfactory to the Dominion government. Premiers Dunning and Greenfield may find that they will have to confer with the Dominion on the legislation proposed. They might find that after passing certain legsilation the Dominion government would not agree to it.

After the conference with the Dominion government, the legislatures of each province would have to be summoned. That takes some time The sessions could not get going before the beginning of next month at the earliest. Then the proposed legislation would have to be discussed and put through in regular routine manner. It would have to be put through as adopted at the conference of the three governments. The opposition in either province could, is so disposed, hold up the legislation for days. One obstinate member of parliament could hold up legislation.

Following that the Dominion government would have to take action, and after that the wheat board organized. That would take time . It might possibly be the middle of September before and action could be taken.

Nothing will be done by the government of Manitoba in any way about an inter-provincial conference on wheat control until after the election. If the government is returned, which seems very doubtful, it will probably take up the question then, if it is not too late. Nothing will be done sooner. The elections take place on July 18.

Owing to the absence from the city of Premier Dunning yesterday any official intimation as to when the conference will be held could not be obtained.

Meetings at Etzikom And Manyberries

W. G. Johnston, M.P.P. for Medicint Hat, H. W. Wood, president of the U.F.A., and Hon. Perren Baker, minister of education, attended the picnic at Etzikom on Dominion Day. In the afternoon the three gentlemen addressed a meeting, Mr. Wood pointing out why the farmers of the West should have a wheat board; Mr. Baker speaking of educational topics, and Mr. Johnston explaining what legislation had been introduced in the provincial [illegible] that would be of benefit to the farmers.

Later the party motored to Manyberries where speeches along the same lines were given at a meeting there in the evening.

A shipment of five hundred tons of British Columbia potatoes was recently made to Cuba. The potatoes were all grown in the neighborhood of Vancouver city.

Program For Next Sunday Band Concert

The following is the programme for the band concert to be given in the open air next Sunday evening at 8.45:

O Canada.
March—"The Olympian."
Overture—"Arbitration."
March—"Slippery Hank."
Valse—"Smiles, Then Kisses."
Romanze—"At Sunset."
Selection—"Bohemian Girl."
March—M"Higham."
God Save the King.

World Disarmament Is Drawing Nearer

World disarmament was declared by Lord Robert Cecil to have been definitely brought nearer yesterday by the action of a sub-committee of the temporary mixed commission on disarmament on the league of nations in approving his plan for armament reduction. Teh measure provides for a general reduction of air and land forces, under the supervision of the league of nations, as well as for continental alliances against aggression.

The sub-committee formally approved Lord Robert's plan and sent it back to the full commission. It is taken for granted that the commission will ratify the recommendation in its final session.

The full committee approved the British plan for extending the Washington naval accord to all nations, Thus the league assembly, at its September meeting, will have before it a definite program for world reduction in armies and navies.

STAMP TAX EFFECTIVE AUGUST FIRST

Some confusion apparently has arisen with regard to th edate when the new stamp tax on cheques will come into force. An official announcement intimates that the new rate of two cents stamp tax for every $50.00 of the amount of money for which the cheque is drawn up to, but not exceeding $5,000, will become effective on August 1 next.

Job printing in first class style at The Review office.

TELLS HOW CATARRH IS DESTROYED QUICKLY

Catarrh sufferers, meaning those with colds, sore throat, bronchial trouble, etc., can all be fixed up right at home by inhaling "Catarrhozone." In using Catarrhozone you don't take medicine into the stomach—you just breathe a healing piney vapor direct to the lungs and air passages. The purest balsams and the greatest antiseptics are thus sent to every spot where catarrhal trouble exists—germs are killed, foul secretions are destroyed, nature is given a chance and the disease ends quickly. Colds and throat troubles can't last if the pure healing vapor of Catarrhozone is breathed—sneezing and coughing cease at once because irritation is removed. Bronchitis, irritation and weakness in the throat soon disappear. Use Catarrhozone whether young or old. Two months treatment $1.00, small size 50c, dealers everywhere or The Catarrhozone Co., Montreal.

MY CANADA

— BY —

ELINOR MARSDEN ELIOT

Published by Special Arrangement with the Author

(Continued)

We were hardly seated when the train started with even more than the usual noise and the horses immediately tried to climb the elevator that stood a few feet to one side of the road. I clutched Mary's arm and choked back a scream. And when order was restored, "Livingstone" turned to us and said, apologetically but calmly, "I'll have to put these brutes on the plough, they are a trifle fresh." A trifle fresh!—our lazy old pony and the staid carriage-horses Mrs. Carstone used to send for "the Restory ladies" have left me with many things to learn, I can plainly see. How glad I am that I did not scream!

We were only a few moment reaching our destination, which was a fairly large two-storey wooden building, unpainted, but weather-stained to a lovely grey shade. A stout, energetic-looking woman came out as we drove up and welcomed us with a smile that would have put the Cheshire cat to shame.

"My, but I'm powerful glad to see you! I haven't had ladies to stay in my house since I came to Elba." And she helped us down, for "Livingstone" could not leave the horses that were a trifle fresh.

Then I turned to our driver, "Your charge?" But he became a beautiful terra-cotta colour, and with a hurried "The obligation is mine," he touched the horses with the whip and was off in a cloud of dust before I could decide whether he was offended, amused, or only shy.

Mrs. Mills (she had introduced herself by a graceful wave of her hand towards the sign-board, "I'm her") laughed aloud.

"Good Land, if that ain't the funniest thing I ever seen! Don Livingstone has got more money than you could shake a stick at, an' to think that you offered to pay him!" And she went off into another spasm.

"My friend has not been in the country long, and she does not understand all our ways," explained Mary with dignity.

"No offence, Miss, no offence! But come right in. You'll be tired with your trip, an 'a bite of dinner won't hurt you none, I'll warrant," said Mrs. Mills. And she caught up a bag in each hand and hurried inside, Mary and I following with becoming meekness.

The room we entered was large and airy, but beyond that little can be said in its favour. The floor was bare and none too clean, the walls were unplastered. The furniture consisted of a long narrow table, several chairs painted a bright yellow, and a stove that gave no evidence of having been polished since it left the factory. This was apparently the dining-room, for the end of the table was covered with a turkey-red cloth and laid for one.

Mrs. Mills never ceased talking.

"I'll have some dinner ready in a jiffy. Mr. Hartford—him as is the English Church missionary—ain't come for his yet, an' you can eat together! he'll be glad of company. Come right upstairs with me now and lay off your hats. Do you want one room or two?"

"One will do," said Mary. "We shall be here for only one night and we should like to be together."

"You could just as easy have two," replied Mrs. Mills, as she preceded us up the open stairs which rose from one side of the room. "Room's about all we've got here, and we've got lots of it—inside an' out. This house was built last summer when the railroad was being put through. All the men in the construction camp got their meals here an' some of the bosses slep'; but business is slow now, an' if it wasn't for the few steady boarders I've got, I'd be down an' out. But it's all in the game, an' the Lord helps them what helps themselves, an' they do say that an elevator gang is coming here next month, an' that will help the exchequer some, as Mr. Mills used to say." Mrs. Mills is apparently a philosopher in her own way.

"There's two empty rooms, an' you can have whichever one you want. Seeing as it's for ladies, I could wish they were more fancy like, but you'll sleep just as good I guess, Miss—— Land sakes! I'm that rattled that I clean forgot to ask your names!"

We gave the required information and then entered the first room. It contained an iron bed, a washstand on which was a basin and jug, and a small and uncomplimentary mirror. These things were what one might call the physical features, but in addition we saw two suitcases, rather the worse for wear, and—hanging on the row of hooks that did duty as wardrobe—several suits of men's clothes. Immediately the room took on a personality and I asked to see the other one.

"Them things," said Mrs. Mills in reply to my look of inquiry, "belongs to a drummer" ("Travelling salesman," whispered Mary) "what stayed here for a week in the winter. I suspicioned from his loks that he weren't none to honest—he was one of them kind that his eyes would have run together if it hadn't been for his nose—an' sure enough, first thing I knew he went off on the afternoon train without paying his bill."

We crossed the hall to the second room, which was furnished in the same manner as the first one, but but which showed no traces of its former occupants.

"This will do nicely," I said. "And now, Mrs. Mills, if you could let us have dinner at once . . ."

"Bless your heart! I'm so glad to see a new face that I'd talk all day if somebody didn't put the brakes on," she interrupted. "But, being as you've reminded me, I'll go now. Come down to the dining-room just as soon as you're ready." And with this she hurried away.

In less time than it takes to write about it, Mary had opened her bag and taken from it a cake of soap and a roll of paper towels and raised the window to its full height; and then by a judicious distribution of our worldly goods she gave the room an almost homelike air.

"Wash your face and hands and tuck up your truant locks, Elinor," she advised. "And don't forget Mennens—an English Church missionary sounds rather interesting. Aside from its efficacy in the matter of sunburn, talcum powder is a great moral support."

As usual, I followed Mary's advice; and then sought in vain for a place in which to empty the water so that Mary might have her turn.

"What do you suppose an unscreened window is intended for?" asked that inventive young person. "Here, hand me the basin," and before I realized what she meant to do, she had spilled the water out of the window.

"Well," drawled a pleasant English voice from the ground below, "what tricks are you young scamps up to now? When I was a youth I was taught to respect the clergy, but in this enterprising country . . ."

I heard no more.

"Oh, Mary," I gasped, "that must be Mr. Hartford! Do you think you hit him?"

"I don't think so," she replied coolly, "and even if I did he will soon dry in this hot sunshine. Probably he was sent out here by the Society for the Propagation of the Gospel among the Heathen, and in that case he would expect scalping, at least—a little bit of cold water will not hurt him."

(To be continued)

Indoor Life

Spending more time indoors makes women far more subject to constipation than men.

The liver becomes sluggish and torpid, the bowels constipated and the system poisoned by impurities.

If you would get away from the myriads of ills which result from constipation, it is only necessary to use Dr. Chase's Kidney-Liver Pills.

The benefits from their use are as lasting as they are prompt and certain.

Mrs. John Barry, 18 St. Amable Street, Quebec, Que., writes:

"This is to certify that I was troubled for years with constipation and tried all kinds of medicines without relief. At last my husband suggested that I try Dr. Chase's Kidney-Liver Pills. I did so, and must say that they have given me more relief than all the medicine I have taken during the last fifteen years. I may also add that I have used Dr. Chase's Ointment for piles with excellent results."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

The WISHING FAIRY

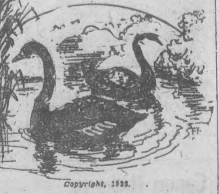
by Corinne

LAST week's story told about the wicked Prince Carl and his wife, the Princess Elsa, who plotted to kill an old man who had come to them for shelter and to rob him of the sack that he had told them contained the most wonderful thing in the world. They entered his room in the middle of the night, expecting to find the old man asleep. But he was not. Instead he met them at the door of his room, his hand upraised and a great light encircling him, which seemed to affect the wicked pair in such a way that they were unable to move and only heard his words as though in a dream.

"The moat surrounding the castle," said the old man in a voice deep with anger, "shall be your home after this. I, who am a powerful Fairy in disguise, shall change you into two Black Swans and from this moment, so you shall remain until you are sincerely grieved for all the terrible sins you have both been guilty of and until a little child shall really love you."

Princess Elsa screamed in terror, but it was of no use; for at that instant two Black Swans with brilliant red legs and bills could have been seen in the moonlight gliding over the quiet water of the moat, had anyone been there to notice . . . but there was no one; even the mysterious old man had disappeared! Stillness of the night enveloped the castle. Had anyone been there to see they would also have noticed that great tears trickled down from the eyes of the two Swans to the surface of the moat, which was now their home.

In the morning there was great consternation among all the servants and followers of the Prince and Princess! There seemed no way of finding out what had become of their master and mistress, who had apparently disappeared from the face of the earth. Every one noticed the two beautiful Swans; but neither could anyone understand their being there. They supposed that they had arrived at the moat during the night, having flown there from other countries. Soon they stopped wondering, and before long the wicked Prince and Princess were forgotten, and after some years the castle was but an ivy and vine covered pile of neglected ruins. There was no signs of life anywhere, but the hum of insects, the songs of birds amongst the ivy and the two Black Swans, who arched their shiny necks and dipped their blood-colored bills in the water; and though tears always flowed from their eyes their hearts were just as wicked as when they had been Prince Carl and Princess Elsa, and, stranger yet, they did not die after a few years, as most swans do, but lived for ever so many years.



Copyright, 1922.

"But tell me, Stella," asked Pimzie, who was just as interested in her story as were the other three Brownies, "are there really such things as Black Swans, or are they also 'make believe' like your story?"

"Oh, dear, yes!" exclaimed the Fairy. "There are. They are rare, and one doesn't see them as often as White Swans; but they do exist."

. . . .

Next week's story will tell how the Swans changed and how what the old man had said happened to come true.

Value of Products

The estimated value of agricultural and livestock products produced in Alberta in 1921 was $137,455,706. Of this sum, grains, fodders and vegetables accounted for $82,795,290; animals slaughtered and sold $17,290,416; dairy products, $25,500,000; wool, $300,000; game, furs, etc., $1,500,000; poultry and poultry products $8,470,000; and horticultural products and garden stuff, $1,600,000.

Demand for Seed Exceeds Supply

The farmers of Prince Edward Island have had considerable success in raising pedigreed seed oats and certified seed potatoes of the best varieties. This year the demand for island-grown seed, whether for grain or potatoes, greatly exceeds the supply.

Lawn tennis has recently become a craze among young girls and women in China.

England's "Mystery Towers"

Were Intended to Keep German Subs Out of Channel'

The secret of England's "Mystery Towers," fourteen of which were to have been built to close the English Channel to German submarines, has been revealed by the Government's request for £80,000 to destroy one of them as useless. Since the war the Admiralty has been conducting experiments with one of these huge towers and progress has never been divulged. But recently, Lieutenant-Commander Kenworthy in the House of Commons tore aside the veil. During the latter days of the war, he explained, it was necessary at all costs to keep German U-boats out of the channel and the romantic scheme of the "Mystery Towers" was evolved. "Someone," went on Mr. Kenworthy, "hit upon the idea of making concrete and steel towers which could be towed out and sunk on certain selected sandbanks in the channel. On those towers were to be mounted searchlights and guns, and they were also to be equipped with listening apparatus—hydro-phones—for detecting submarines, and with firing apparatus for exploding mine fields through which submarines were passing.

"It was very good from the point of view of the war, but unfortunately it was hit upon rather too late." Nevertheless, two of the towers were completed at a cost of £5,000,000. One is now being used for a lighthouse and it is for the destruction of the other that the Government is asking the Commons for funds.

Vancouver Extending Exports

Further innovations in extending the exports of the Pacific port are reported. The experiment of sending frozen fish to New York, via the Panama Canal, was successful in every respect and a second ship has left with a further consignment of 350 tons for the same market. For the first time British Columbia lead and spelter has been shipped from the port of Vancouver to Europe via the Panama, and large quantities will in future go forward to Belgium and the United Kingdom.

Rockfall, a small island 260 miles north of Ireland has sunk three feet in the past 33 years.

Saskatchewan Sheep for Idaho

Big Shipment of Pure-Bred Animals Sent from Drinkwater

The market for Saskatchewan sheep has extended as far afield as Idaho, according to J. F. Booth, of the co-operation and markets branch of the Saskatchewan Department of Agriculture.

Mr. Booth announced that R. A. Wright, of Drinkwater, has shipped a double decked carload of pure-bred sheep to Idaho. "To build up a flock of pure-breds," said Mr. Booth, "requires skill, patience and capital. It must be very gratifying to Mr. Wright to find that his sheep are in demand in an ever-widening circle."

Baby Specialists.

THAT there are Physicians who specialize on Infant ailments you know. All Physicians understand Infant troubles: all Physicians treat them. It is his profession, his duty, to know human ills from the Stork to the Great Beyond.

But in serious cases he calls in the Specialist. Why? He knows as every Mother knows, or ought to know, that Baby is just a baby, needing special treatment, special remedies.

Can a Mother be less thoughtful? Can a Mother try to relieve Baby with a remedy that she would use for herself? Ask yourself; and answer honestly!

Always remember that Baby is just a baby. And remembering this you will remember that Fletcher's Castoria is made especially for Infants and Children.

Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

The False and the True.

Advertising by the use of large space, the expenditure of huge sums of money have placed on the market, have put in *your* home, perhaps, many articles that today have been discarded, as you will readily admit.

Do you recall anything that has more modestly appealed to the public than has Fletcher's Castoria: modest in all its claims, pleading at all times—and truthfully—for our babies?

The big splurg, the misleading claims may win for a time, but the honest truth-telling advertiser is like the old story of the tortoise that beat the hare.

Mothers everywhere, and their daughters, now mothers, speak frankly, glowingly, enthusiastically in praise of Fletcher's Castoria. Speak of it lovingly as a friend that has brought comfort, cheer and smiles to their little-one.

To them: to these true mothers no argument can induce them to set aside their bottle of Castoria, their old friend, that they might try even another and unknown remedy for babies. Then, would YOU think of going to YOUR OWN medicine chest to find relief for Baby's troubles? Can you not separate the false from the true?

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS Bears the Signature of Chas. H. Fletcher.

The State as a Jewel Merchant

Government of Queensland Forced to Protect its Gem Miners

To the rubies, opals, emeralds and blue sapphires mined in the State of Queensland which have long had their principal market in Paris have been added discoveries of orange sapphires. The gems are sold in Europe at such high prices that the amount paid to the miner is poor by comparison. The miners have now asked the Government to pool the gems and market them on community account.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Round the World Cruise

Starting Next Winter Trip Will Take Four Months

The C.P.R. steamship, Empress of France, has been chartered for an all round the world cruise next winter.

The trip, which will occupy four months, commences from New York, January 23, 1923, and will take in the West Indies, the Panama Canal, Japan, India, the Malay Peninsula, Egypt, Italy, France and Great Britain, after which a run across the Atlantic will terminate the tour at Quebec about May 23. Fourteen days are allowed in Japan with an option of 19 days in India.

Twenty-five years is the average life of a coin.

Monuments to military heroes are unknown in China.

Bear Attacks Mail Stage

Driver of Yukon Coach Kills Unique Mail Robber

Bill Boulet has the distinction of being the only stage driver in the Yukon who ever had to kill a mail robber. He drives a four-horse stage on the long overland route between White Horse and Dawson. Recently, what is said to be the first mail thief in the history of the Yukon, attacked Boulet's stage—and died.

It happened in Alberta, a road-house, on the long trail, where Boulet was paying an official call. Looking out of the window he saw an immense black bear on top of the coach, throwing the mail sacks to the ground and smashing express parcels. Boulet levelled his rifle and a dead bear tumbled to the ground.

Plague of Locusts in Russia

A plague of locusts promising greater destruction than that of last year, has developed in the Caucasus, Baku, Kuban and the Crimea. It is a serious blow to South Russia's hopes for successful crops, and the peasants have mobilized to fight the pest with gasoline. Even airplanes have been utilized, being sent to drop poisonous bombs in the breeding areas.

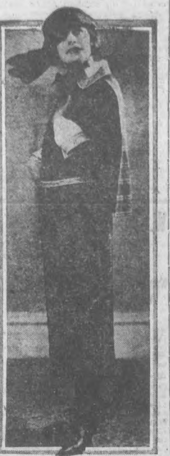
Happy Albania

Happy Albania is the term applied to that country, for it is said that it occupies the unique position among European nations of being the only country which has no national debt and has a gold currency.

Memedi Frasheri, the head of the Albania delegation to the conference at Genoa, in an interview indicated that all would be well with the country "if only we were left in peace for a little while."

A locomotive was imported from England in 1829, to serve as a model for American builders.

Here Is Something Smart



Very chic is this dress and one that will be found to meet the general needs of milady. It can be worn to business or as a sport dress, and is a very practical model for the spring and early summer. The cape-like back adds materially to its smartness. It is of black, with Roman stripes. The hat, which is of black straw, is adorned with black quills.

THE ORIGIN OF GALL STONES

They are simply dried bile made up of Crystalline constituents of that fluid. Very common is this disease among merchants, clergymen, shop girls, and those of sedentary habits. Prevention consists in maintaining correct action of the liver and bowels, and this is speedily accomplished by using Dr. Hamilton's Pills. No person using Dr. Hamilton's Pills will be subject to bilious fits. Sound digestion, good appetite, a clear color will evidence the health giving properties of Dr. Hamilton's Pills which are safest and best for general family use. When a laxative is needed, when you feel out of sorts, that's the time to use Dr. Hamilton's Pills of Mandrake and Butternut, 25c all dealers or The Catarrhozone Co., Montreal.

Broadcasting in Two Languages

Cold Air from Her Well

A woman at Newark, N.J., has a dry artesian well which always emits a stream of cold dry air. This she has had piped through her house, where it is used for drying clothes, and in place of ice, and for keeping the house cool in summer.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Moise Cadotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Seeing Western Canada

Personally Conducted Tours to the Pacific Coast

An unusual opportunity for seeing Western Canada and the Pacific Coast under most favorable conditions and at a minimum expense is afforded by the Canadian National Railway. The Company announce a personally conducted tour through the Rocky Mountains. A special train will leave Winnipeg on June 30th at 11.30 p.m., and will connect with a G.T.P. steamship from Prince Rupert on July 6th. Stops will be made at the following points of interest en route: Watrous, Saskatoon, Wainwright, Edmonton, Jasper, Mt. Robson, Prince George, Kitwanga, Terrace, Prince Rupert, Vancouver, Victoria and Seattle. A choice of route for the return trip may be had. For full particulars apply to any agent of the Canadian National Railways or write to W. J. Quinlan, District Passenger Agent, C.N.R., Winnipeg.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

A Vanishing Disease

Number of Tuberculosis Cases Are Being Gradually Reduced

A summary of the work done by the New York State Charities Aid Association during the last fifty years indicates the progress possible in fighting certain kinds of disease. The fall in the tuberculosis death rate from 129.3 per thousand in 1918 to 86.2 per thousand in 1921 is already a matter of common knowledge. The society attributes the result to more hospitals, more visiting nurses, more city dispensaries, the establishment of rural clinic service, open-air classes for tubercular children summer camps, and recently enacted state laws of which the above are sometimes the result. The great progress already made, however, seems little more than a healthy start toward actual eradication. The society announces the appropriation of between $300,000 and $400,000 a year for at least five years by the trustees of the Milbank Memorial Fund, left by Elizabeth Milbank Anderson. This money will be used for tuberculosis control. The results expected are similar to those secured in Framingham, Mass., during the last five years. There, for only $2.40 per inhabitant per year, tuberculosis deaths have been reduced 67 per cent. The Milbank trustees hope for a demonstration in pulmonary disease paralleling the fall in typhoid from twenty-seven per 100,000 to less than four per 100,000. This is close to an announcement that one of our most common and dreaded diseases can be made a rarity.—St. Thomas Times-Journal.

A new ferry line, the longest in the world, is to be operated between England and Sweden.

The exact cause of sleep is unknown.

Viscount Northcliffe Suspicious of Japan

Nation as Powerful as Germany Was In 1914

Viscount Northcliffe, writing personally in the Daily Mail, calls upon his countrymen to "Watch Japan." "Why," he asks, "are the Japanese people being taxed more severely than any other nation for the support of armaments," and he gives this reply to his own question: Japanese art, Japanese industry, the constant, if imitative, desire of the people for "uplift," and Japanese patriotism are very admirable, but there were two Germany's, and while Japanese Liberalism, of which Three Elder Statesmen (the Genro) are much afraid, is allowed occasional expression, I know from personal observation and information that the Pan-Japanese are as powerful today in Japan as the Pan-Germans were in Berlin in 1914. Before I visited Japan I said to one of our most distinguished authorities on the Far East—a Scotsman who had lived for years in those romantic lands: "What is the obeject of Japan?" He replied: "The control of China." "And then?" "The control of the world; for who controls China could control the world."

Norwegian Colonists for Alberta

A welcome addition to Canada's population arrived at Quebec on board the Canadian Pacific steamer "Montrose" from Liverpool, in the form of over forty well-built Norwegian colonists, who were on their way to Sedgewick, Alberta, where they will engage in farming. This is the third large party of personally conducted colonists to arrive in Canada this year under the auspices of the Canadian Pacific Railway.

Do Large Breaths Hurt? Is Your Chest Wheezy?

Proper treatment is a vigorous rubbing of the chest, neck and sore side with good old Nerviline. This wonderful liniment sinks into the tissues where the pain is seated and gives instant relief. That catch disappears, all sense of soreness goes quickly. Just try Nerviline for chest tightness, coughs, colds and soreness. It's a wonderful Liniment, saves the whole family from numerous minor ills and should be in every home. Large bottles, 35c, at all dealers.

Royal Plebes

Many English-Speaking People Are Descended from Charlemagne

Most of us have Royal blood in our veins, though we don't know it. One Isabel de Hermandois died in 1131. Twice married to nobles, she claimed descent from Charlemagne through six separate lines, and left four children whose descendants can be traced right down to the present time, with the result King George V. and Abraham Lincoln are each separated from her by twenty-six generations—an honor shared by a New York farmer—whilst George Washington is four generations nearer. A Dr. Jordan says in view of all this that, through Isabel, "the English-speaking population of the world consists of inbred descendants of Charlemagne." Now we will be really good.—Montreal Gazette.

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

A Good Battle Cry

"A Rotarian is a man who does not grab the stool when there is a piano to be moved," is the thought expressed in a recent bulletin of that organization. There are a great many pianos to be moved in this world today and we do not think a better battle cry could be found for men on every job—including all branches of the newspaper business.—Editor and Publisher.

Minard's Liniment used by Physicians

May Return to Germany

The return of former Crown Prince William to Germany in the near future is probable.

It is understood that the ex-Kaiser's son will give up his abode on the island of Wieringen and settle down in Germany, to live quietly as a country squire. The Berlin Government is making his return conditional on a promise that he will not engage in any political activity.

NOTHING TO EQUAL
MINARD'S
"KING OF PAIN"
LINIMENT
For Sprains and Bruises
The first thing to do when you have an injury is to apply Minard's famous Liniment. It is antiseptic, soothing, healing and gives quick relief.

ARE YOU A MOTHER?
Mrs. Dalton tells of a Well-known Doctor's Prescription that is safe for Young Mothers to take as a Tonic and Nervine because it contains no harmful ingredient.

London, Ont.—"Dr. Pierce's Favorite Prescription saved my life years ago and for that reason I am most enthusiastic in my recommendation of it to women who are ailing and weak. I was taken with the measles when in an expectant condition; then blood poisoning set in and my family became greatly alarmed. The doctor advised him to give me Dr. Pierce's Favorite Prescription and I took several bottles of it and was restored to absolutely perfect health. I later took Favorite Prescription as a tonic and nervine and received great benefit from it. As a woman's medicine it is unequalled."—Mrs. Jennie Dalton, 767 York St.

HEALTH BRINGS BEAUTY
Your Health is Vital to You
Barrie, Ont.—"I was suffering from a rundown system some time ago, was unfit to perform my daily duties, and was advised to try Dr. Pierce's Favorite Prescription. I tried it, took two bottles, and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly and will be willing to write to any one sending stamped envelope."—Mrs. A. H. Bishop, R. R. No. 1.

You'll soon feel better if you obtain this "Prescription" of Dr. Pierce's at your nearest drug store, in tablets or liquid, or send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. tablets and write for free medical advice.

An Ambitious Project

Temple to Replace Burned Shrine at Saint Anne De Beaupre

A temple costing $3,000,000 is to be erected in Ste. Anne De Beaupre to replace the destroyed one, according to an announcement made by the Redemptorist Fathers, and a monastery of $500,000 to provide accommodation for the residing fathers. At the same time it was also stated that in view of the importance of the work a contest open to all Canadian architects and bearing a prize of $15,000 for the successful candidates may be held in connection with the scheme.

The use of blank space in separating words in writing was not begun until the tenth century.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

J. D. Rockefeller has transferred nearly all his fortune to his family, to obviate paying death duties on his demise.

BEAUTY OF THE SKIN
is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, roughness and redness of the skin, irritation and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmanson, Bates & Co., Limited, Toronto. United States $2.50

Issued on Thursday of each week at Redcliff, Alberta.
Advertising Rates Furnished on Application.

THE REDCLIFF REVIEW, THURSDAY, JULY 6, 1922.

POOR SERVICE

The service we are getting at the C.P.R. station here lately is the worst it has been for some time past. Th epoor service is not the fault of the station staff, all of whom are most courteous and obliging, but rather the result of the system under which the company is working at present. Under this system we now hav eno service whatever on holidays and Sundays. On those occasions Redcliff people are unable to send telegrams, purchase railway tickets, or get baggage checked if they wish to go traveling, and, as a result, are put to considerable inconvenience and expense.

Surely a town which has been such a paying proposition to the C.P.R. as Redcliff, is entitled to a little more consideration and better treatment than this.

* * *

We would draw the attention of farmers especially to the Weekly News Bulletin appearing in each issue of this paper. This Bulletin is issued by the Publicity Commissioner under the direction of the Legislature, and deals with legislation being enacted from time to time. It is a good way to keep posted in what is going on at Edmonton.

* * *

The Toronto Globe says: "Wheat control, reduced freight rates, lower duties on implements—if the Progressives do not reign at Ottawa, they have a substantial share in government."

* * *

There is quite a controversy on just now to decide what kind of men make the best husbands. The one who said that women make the best husbands was nearest the solution of the question.

* * *

The response to the call for men for the grasshopper drive in town Wednesday morning makes it look as though there are a number here who are quite willing to "Let George do it." no matter what the occasion may be.

* * *

There appears to be some who think they should be treated to lunch and refreshments when they are out on a grasshopper drive. However we feel sure that if they stopped to consider conditions they would not expect any such treatment. With the crops not any too promising and with the possibility of grasshoppers getting what there is, the farmers are in none too good shape to be serving pink teas and red lemonade.

* * *

As there will be considerable detail in connection with legislation and organization before a Wheat Board could be established along lines laid down by the Dominion government, it is very doubtful if one could be arrangin' time to be of any service for handling this year's crop.

No Decision Yet Regarding Wheat Board

Greenfield Says Matter Will Be Taken Up By Cabinet At Earliest Possible Moment So As To Give Time For Calling of Legislature If Necessary.

That no decision has been reached by the provincial cabinet with respect statement made by Premier Greenfield to the proposed wheat board was the this week.

The premier said that although the question of the wheat board had been discussed by the cabinet no decision had been reached yet as they had delayed action until the bill had finally been passed by the house. He declined to state what the contemplated action of the government was in this respect but said that this matter would receive the attention of the cabinet. It was probable, he said, hat it would be discussed by the cabinet next week in order that an early decision might be reached so that there would be ample time to call a session of the legislature to take action in time to market this year's crop.

Alberta Premier Wants Satisfied Settlers

"Though Canada and the west, particularly, is destitute of population, it would be a mistake to embark into a large immigration scheme until conditions for settlers have been bettered."

This statement was made by Premier Greenfield while addressing the Calgary Board of Trade.

"The best immigration propaganda is a satisfied settler," declared Mr. Greenfield, and went on to say that while conditions were improving, they had not yet reached the stage where new settlers could write back and tell their friends of the success they were meeting.

Teh premier also made a plea that it is the duty of every citizen of the province to strive earnestly to remedy conditions which are driving the young men from the farms.

Premier Greenfield said:

"I have been trying my best to get a comprehensive grasp of the province of Alberta and its relationship to the Dominion as a whole. One of the things we suffer from is that Albertans do not know their province and Canadians do not know Canada." Mr. Greenfield said this was largely due to the vast extent of the territory and remarked that he had been surprised to find how little men in the east knew of the west.

Take Advantage Of the Relief Act

The first public demand for the assistance of E. J. Fream, as commissioner under the southern Alberta relief act, was made when representations were made to him to attend a meeting of the farmers of the Lomond district, about 80 miles southwest of Calgary, to take place July 8, and at which it will be determined what they are going to do in regard to successive crop failures in that locality. The crops there are again completely burned out, it is asserted.

In the meantime Mr. Fream is being swamped with inquiries from farmers who are asking him for assistance in straightening out their financial affairs. "I think I can safely say that I have received 1,000 letters, Mr. Fream said.

Most of these inquiries take the form of a simple statement of assets and liabilities and a request for advice. Mr. Fream is sending to all a questionnaire which he urges be fully filled out and quickly returned to expedite the work.

"Generally, I am getting every encouragement," Mr. Fream said. "I hope the debtors will lay their cards on the table so that full confidence may be established. The creditors are offering every co-operation in letters and in personal interviews."

Result of The Public School Examinations

The ollowing is the list of successful pupils in the public school examination held just prior to closing for the midsummer holidays:

ENTERING GRADE I.

Senior Class A—Anna Kerr, Edith Collard, Frank Scott, John Soukup, Mary Soukup, George Dominic, Margaret Johnson, Harvey Fitzhenry August Coquin, Andre Coquin.

Class B—George Waters, Mac McIntyre, Eddie Champ, Leslie Bainbridge, Eddie Keats, Albert Johnson.

Class C—Karen Peterson, Stella McClary, Charlie MiMller, Agatha Reynen,Flossie Atherton, Harold Kniesley, Blaudivin Evans.

Standing of those remaining in Primary from class entering at Easter—Albert Podesta, Mary McAphee, Mary Broughton, Eddie Bezler, Kathleen Eldon,Eddie Moses, Rudolph Wiedcan, Alfred Lokis.

From Grade I to Grade II.
(In alphabetical order).

Jack Alderton, Erwen Bezler, Donald Barber, Annie Brassie, James Brown, Dorothy Cockrell, Frances Elden, Robert Fielding, Mary Goodine, Vera Goodine, Claude Hawthorne, Frank Hawthorne, Kerwood Henderson, Ross Jackman, Samuel Kirkpatrick, Dick Luyten, Eugene McAphee, Eva McIntyre, Margaret Rutherford, Reuben Schmitt, Madeline Towle, Willie Tonks, Billie Moses, Effie Vernon.

Promoted from Primary I. to Grade I.

Marion Alderton, Donald Duffield, Esther Etterman, Jemima Fulton, James Fulton, Maurice Locke, Pearl Moore, Teddy MMaskell, Arthur Washburn, Myron Woke, Edna Wilke.

Grade II. to Grade III.

Clifford Bergeron, Irene Bucholz, Florence Devitt, Emma Elden, Marion Henderson, Rex Jackman, Clarence Jacobson, Dan Jenson, Evelyn Jones, Clement Johnson, Peggy Learmonth, Lorne Locke, Elsie Luyten, Raymond MacHenry, James MecDermott, Sam McCleary, Ernest Podesta, Everett Ross, Eileen Scott, Billy Selhorn, Robert Stratton, Robert Thacker, Alex. Vernon, Katie Waters, Jane Waters, Edna Wowk, Joseph Wells, Catherine Wallace, Caroline Hinke, Hazel Ross.

Recommended for Grade III—John Dutton, Doris Bainbridge.

Special Case—Warren Shafford.

Grade III. to Grade IV.

Lancelot Amdahl, June Amdahl, Francis Buckholz, Martha Balmer, Doris Bergeron, Lee Belisle, Orpha Bezler, Evelyn Cook, Muriel Collard, Leslie Cockrell, Joseph Crooks, George Evans, Nelson Etterman, Dorothy Ferguson, Evelyn Hicks, Arthur Harrie, Mary Kellet, Eleanor Kniesly, Olivine Kirkpatrick, Marion Kniesly, Dorothy Kitchen, Lena Luyten, Eldon Locke, John Leach, Mary Maskell, Irene Miller, Charles McAfee, George Oakland, Evelyn Potter, Jennie Pearson, Donald Ross, Ronald Ross, D. Lawson Smith, Irwin Smith, Eleanor Setterlund, Mary Tonks, Lillian Towle.

Special Case—Ruth Crooks.

Recommended for Grade IV.—Edward Johnson, Ronald Walker.

Grade IV. to V., Edmonton Papers

Honors, 80 per cent—Gladys Atherton, Isabel Cox, Tony Molso, Margaret Hicks, David Broadfoot, Eva Pinder, Elsie Frey, Stanley Pickering, Edith Wilson.

Pass, 60 per cent—Beatrice Tester, Wilfrid Thomson, Howard Keats, Allie Lokis, John Wallace, Thomas Dutton, George Kirkpatrick; Horace Atherton, John Jackman.

Recommended—Billy McLeary, 47; Etta McLean, 54.

Grade V. to VI.

Honors over 75 per cent—Howard Duffield, Willy Bulmer, Agnes Jones, Margaret Wallace, Carrie Luyten.

50 to 75 per cent—Ethel Wilkie, Edith Jackman, Winnfred Belisle, Nellie Miller, Henry Jacobson, Walter Walter Lydiatt, Kenneth Ross, Ruth McAfee, Tom Tonks, Anna Lokis, Clair Bergeron, John Grey, Ivy Podesta, Nathan Setterlund.

Recommended—May Oakland.

Grade VI. to VII.

Honors—Ernest McLean, Lois Pindar and Frank Molso equal.

Pass—James Waters, Lizzie Evans, Arthur Etterman, Ada Vernon, Elnora Ziegler, Marjary Wright, Ivy Fielding, George Wells, Albert Jones and Ruth Aleorn and Langley Stone equal, Bruce Dunnett and Violet Wright equal, Charlie Ziegler and Cleo Ross and Tom Rutherford equal, Neil Rutherford.

Grade VII to VIII.

Honors—Muriel Belisle.

Pass—Lilian McDermott, Clark Jacobson, Marie Fitzhenry, Edith Johnson, Sidney Worts, Mamie Jackman, Margaret Podesta, Roy Bergeron.

On trial—Vina McLean, Iris Wedderburn, Hilda Waters.

W. N. TILLEY, K.C., HAS FINE RECORD

Newly Elected Director of C.P.R. Widely Experienced in Constitutional Railway Law

W. N. TILLEY, K.C.

W. N. TILLEY, K.C., who has been added to the Board of Directors of the Canadian Pacific Railway due to the vacancy caused by the death of Sir John Eaton, is one of the leaders of the Canadian Bar. He has, in addition, specialized in railway legal work and has been actively engaged as counsel in all of the larger railroad questions in Canada since 1914.

Mr. Tilley's connection with the Canadian Pacific began about ten years ago, when he became Special Counsel for the Company, handling all their important Appeals and acting as Counsel in various Rate Enquiries. His connection became more intimate in 1918 when, upon the election of E. W. Beatty to the Presidency of the Company he was appointed Consulting Counsel.

Mr. Tilley's wide experience in constitutional railway and corporation cases has resulted in his being retained both in the Canadian Courts and the Privy Council in most of the important issues of the past ten or twelve years, his first outstanding case being the International Fisheries Arbitration at the Hague, where he appeared as one of the counsel for the Dominion of Canada and Newfoundland. He has successively appeared as counsel for the Dominion Government in the Canadian Northern Arbitration and the Grand Trunk Arbitration, for the Ontario Government in the Ottawa School Case, and for the City of Toronto in the arbitration to fix the price to be paid to the Toronto Railway Company for its property. The Appeal from the Grand Trunk Award will be heard in July of this year and Mr. Tilley will appear as counsel for the Canadian Government.

Mr. Tilley was born at Bowmanville, Ontario, in 1868, the son of the late Dr. W. E. Tilley, Inspector of Public and High Schools. He was called to the Bar in 1894 and was Gold Medalist in his final year in Law at Osgoode. He was created a K.C. in 1916.

Perhaps the outstanding characteristic of the C. P. R.'s new Director is his great mental capacity and physical vigor which enables him to grapple with one important case after another without apparent fatigue. He is a prodigious worker and an alert and resourceful counsel in Court. His coolness and clearness in argument are conspicuous and have earned for him many appreciations in the Courts in Canada and in England. By reason of his long experience and his sound judgment in commercial matters and in matters of finance, his advice is much sought in commercial circles. His election is additional evidence of the value to a large corporation of a trained lawyer with a comprehensive knowledge of business methods.

LOCALS SCORE GREAT VICTORY OVER VETS; BEST GAME OF SEASON

PLAYING THE BRAND OF FOOTBALL WHICH WON TROPHY LAST YEAR, LOCAL TEAM NOW HAVE OUTSIDE CHANCE OF AGAIN CAPTURING SAME

Those who witnessed the senior football match played here last Friday evening between the locals and the Vets from Medicine Hat, are unanimous in the opinion taht it was the best game seen here this season, and that the home team never showed up to better advantage. It was an ideal evening for a game and the absence of any wind paved the way for good team work on both sides.

There was not a dull moment during the whole game, and when the whistle blew for the finish all came away feeling satisfied that they had surely got their money's worth and had witnessed a real humdinger.

Except for the lay of the land there was no advantage in the draw, but what there was in this regard was in Redcliff's favor. From the start the homesters assumed the aggressive. They kept up a determined attack for the first ten minutes without success. Play was then transferred to the other end of the field, and for a time honors were about even. Towards the end of the first period, however, Redcliff again got possession and made another series of nice rushes in which all the forwards took part. In these McClellan was the star. He worked like a Trojan and always appeared to be just where he was needed. His efforts were finally rewarded and he landed a beauty square in the nets just before the whistle blew for the first half.

Despite the pace set in the first half the second opened even more lively, with the play very much in Redclif favor. Time after time the forwards came down the line, and as often made an unsuccessful attempt to locate the net. After about fifteen minutes of these repeated attacks Pickering finally scored on a nice pass from Sandy. With two down the visitors entered the fray with renewed effort, and immediately carried the play to the other end of the field, where they were not long in forcing a corner. The kick was nicely placed and from the scrimmage which followed, Green whipped the ball into the net for the visitors.

For the balance of the game the play was more even, but as no more scoring was done the final whistle found Redcliff the winners by two goals to one.

Every player on the home team put up an excellent game, and it was only because of the good work of the visitors' defence that their score was not tripled. During the game the home team had two shots on goal to every one of their opponents. The Vets have nothing to be downhearted about in their defeat in this game, the other teams in the league would have fared the same.

Tomorrow night (Friday), the locals visit the Hat to meet the Callies, and they are looking forward to continuing the good work of last week.

There is considerable excitement on as to who will really win the league after last week's game. It is possible, though not very probable, there may be a three cornered tie, which would make a nice post-season series.

FOOTBALL STANDING

SENIOR LEAGUE SERIES

	P	W	D	L	F	A	P
Vets	5	2	2	1	8	6	6

July 12—Scotland vs. England.

JUNIOR

July 10—Knox vs. Redcliff....league

JUNIORS DRAW WITH MOOSE

Redcliff juniors went to Medicine Hat last Monday evening to meet the MMoose in a cup fixture. The game wa sclosely contested from start to finish, and ended without either tea locating the nets at all.

The way the game ended is a good indication of the play. The forwards on both sides missed several chances to score, but this was probably due to the fact that both defences were putting up a stout game.

Washers and Moose played a one goal draw in the cup last Friday.

WEEKLY NEWS BULLETIN

Importance of cutting a portion of the rye crop throughout the province for hay purposes, is emphasized by officials of the Agricultural Department. The likelihood of a shortage of hay crop in the northern part of the province makes it an urgent matter that farmers who have rye crops put up some of this for hay. The rye should be cut at once for this purpose, and a ton to a ton and a half should be allowed for each head of stock on the farm.

A total of 30,000 acres of land has been listed with the officials of the irrigation council for sale through the government plan to bring in settlers for the lands of the Lethbridge Northern irrigation project. These lands listed are all improved and are listed at from $12.50 to $35 an acre. Dominion and provincial officials are assisting in the colonization scheme for these lands.

Following a conference between Premier Greenfield, H. Stutchbury, trades commissioner, John T. Stirling, chief inspector of mines, and George Pratt, government ingineer, on the question of markeaing of Alberta coal, a further conference will be held this week with some of the coal operators of the province. The entire situation will be discussed thoroughly.

The new civil service superannuation act is now in effect. This provides a fund for superannuation of civil servants, the retiring age for men being 65 and for women being 55. Under this new scheme four per cent is deducted from the salaries of all employees, to which is added four per cent by the government, creating a fund, with added interest, which will provide annuities to civil servants on retirement from the service. Allowance is made for the length of service of employees with the government previous to the act coming into force. The act is administered by a board of which Hon. Alex. Ross is chairman, and F. Smailes, civil service commissioner, and D. Donaldson of the civil service organization, are the other members.

Plans have now been completed for the series of sittings to be held by Prof. D. A. McGibbon in his investigation of banking and credit conditions in Alberta. He will be in Medicine Hat July 14.

Prof. McGibbon will attend all these sittings and will take evidence on the various points included within the scope of the investigation, his intention being to hear in particular the complaints of farmers who find the present banking system unsatisfactory Other interests, including the bankers themselves, will also be heard. When the list of sittings has been concluded the commissioner will prepare a report to the government.

A clinic for babies and children of pre-school age will be held every afternoon rfom 2 to 5 p.m. in connection with the public health exhibit given by the provincial department of health in the Women's building, Edmonton fair. All mothers with babies and children of this age are invited to bring them to this clinic. Doctors and nurses will be in attendance. The regular child welfare clinic will be held as usual in the Civic Block, Tuesday and Friday.

Franklin Peterson, dominion news editor of The Times, London, England, was a visitor to the government buildings during the past week and had a conference with Premier Greenfield and other government officials. Mr. Peterson was particularly interested in gathering data concerning the question of the Britisn embargo on Canadian cattle.

The annual report of the department of agriculture, containing valuable statistical and other information, has now come from the printers and is ready for distribution.

Use of the motion picture for instructional purposes will become extensive in the near future in the department of agriculture. Already films are under way which will give instruction in the livestock and dairy industry. Another picture will deal with the production of pure seed, and still another with the eradication of weeds and soil drifting. A general Alberta picture, depicting all phases of life in the province, dwelling particularly on agriculture is also in preparation for publicity purposes.

The new tax recovery act passed at the last session is now in operation. Land owners in arrears of taxes after July 1st, will still have until August 14 to pay up, but if arrears remain unpaid after that date, the municipality in which the land lies files a caveat against the land, and within one year from the date of filing, if the taxes are still unpaid, the municipality may take title to the land. During the year, owners may pay arrears and the caveat may be withdrawn. After title is taken by the municipality, the owner may still redeem the land up to the time it is offered for sale by public auction. Provision is also made for giving the tax delinquents ample notice, with warning during the month of March that their lands are in arrears and liable to forfeiture and if then not redeemed within the redemption period they pass finally into the possession of the municipalities, free from all encumbrances except claims for seed grain or relief liens.

Volume of business handled by the egg and poultry marketing service of the provincial and dominion governments in Alberta has grown 300 per cent over last year, according to a statement by J. H. Hare, Alberta poultry and marketing commissioner. Over 20 carloads of eggs have already been handled this year by the service, and the staff is kept busy with the amount of business offered. A large staff is being maintained. This service is a co-operative one between the farmers, the Alberta and the dominion departments of agriculture, the dominion men working in the field and the provincial men operating the marketing stations.

Manitoba Farmers Leader

There is a growing belief in well-informed circles that if the United Farmers of Manitoba are called upon to form a government after the elections on July 18 the man who is most likely to succeed T. S. Norris as premier is George F. Chipman, editor and managing diirector of the Grain Growers' Guide, and as such, one who has been in close touch for years with the political and educational movement of the farmers' organization. Other names mentioned some weeks ago in connection with the farmer leadership now are little discussed. There seems to be a feeling that Mr. Chipman more than any other available person, would be acceptable alike to city and country and that he might be expected to reveal qualities of leadership and administrative ability which would launch successfully a Farmer government.

There will be no formal step taken toward the appointment of a Farmer leader until after the election, but reports from the country are said to indicate an inclination favorably to view thepo ssibility of Mr. Chipman's elevation to that post.

CANADA'S PRESSING NEED FOR IMMIGRATION POLICY

Colonization and Development Expert Says First Step Towards Relieving Business Depression Is Establishment of Broad & Progressive Immigration Policy.

The immigration policy of Canada for the future is in the making. It is among the first two or three questions now before the people of this country, and no one is better fitted to advise concerning it than is Col. J. S. Dennis, of Montreal. Col. Dennis has spent fifty years dealing more or less directly with this problem. In the service of the Dominion Government in Western Canada and later with the Land Department of the Hudson's Bay Company and for the past 21 years with the C. P. R. Department of Colonization and Development, of which he is now Chief Commissioner, his activities have been largely directed towards filling Canada's vacant places with desirable settlers, producers of wealth such as are to-day more than ever needed to re-establish the prosperity of the Canadian people.

In view of the fact that the question is to-day of greater public importance than it has ever been, Col. Dennis has made a statement on the subject which will be read with interest in all parts of Canada. In voicing the need of an aggressive and progressive colonization and development policy Col. Dennis points out that it is the foundation upon which the superstructure of the solution of Canada's railway, industrial and unemployment problems must be erected, and he continues:—

"In Canada to-day we have 1 mile of railway for every 236.5 of our population, and, in the four Western Provinces, 1 mile for every 110. Compared with this, the United States has 1 mile of railway for every 404 persons, and Great Britain one mile for every 1,804.

"In the three Provinces of Manitoba, Saskatchewan and Alberta, are 30 million acres of land suitable for immediate cultivation, unoccupied and non-productive, within 15 miles of each side of the railways now in operation.

"In the older provinces of Canada we have many thousands of improved farms, unoccupied and non-productive and waiting for colonists.

"The National Debt of Canada to-day is $2,372,000,000, or about $275 per capita of the population, and the annual interest on this debt amounts to $114,000,000 as compared with a total Federal revenue in 1913 of $168,000,000.

Population of Canada

"The census of 1911 showed that we then had a population of 7,206,643. The last census shows a population of 8,769,484, a growth that is even less than normal. What are we going to do about it? My answer is—"colonize and develop."

"When I say 'colonist,' I use the terms in the broad sense of the immigration to Canada of the colonist who will occupy and make productive, available agricultural areas, and, also laborers, skilled and unskilled, who will develop our mineral and timbered areas and extend our industrial life, and finally, colonization of the necessary capital to make both of the preceding activities possible.

Recalls Old Days

"During the war, and practically, up to date, both our colonization and development have been standing still. We are now faced with the question of how we can again stimulate a large movement of desirable colonists to Canada and where they can be obtained.

"Naturally, as part of the British Empire, we should first look to obtaining the greatest possible number from Great Britain and Ireland.

"The present population of the United Kingdom is 47,000,000, but of this number, less than 4,000,000 are engaged in agriculture, and unless we are prepared to take a large number of colonists without any previous knowledge of agriculture we cannot look for the immigration of large numbers from Britain Further, it would now seem to be perfectly clear that the United Kingdom, and particularly England must look forward to the emigration of many millions of its people and our policy should be aimed at co-operative action between our Government and that of the Home Country to evolve some scheme under which many of these people of the younger generation can be fitted for agricultural life in Canada by some preliminary training at home, and finishing the training here, together with final assistance to enable them to establish themselves as farmers after this training has been obtained.

"We must, naturally, look for a large proportion of our agricultural colonists from the United States.

"We should also look forward to the immigration of large numbers of desirable colonists from Central Europe. While it should be our aim to maintain and extend British ideals and our Canadian citizenship, we must not forget that many who have come from so-called foreign countries are to-day amongst our most progressive and valued citizens and who have been, and are taking an active part to solve our national problems and are proving their willingness and desire to become good Canadians, as is proved by the fact that in one of our Western Universities, over 50% of the students are of so-called foreign parentage, and that, during the war, many of our military units contained upon their rolls the names of many so-called foreigners.

No British Need Apply

"Canada has no definite emigration or colonization policy at present, and, in fact, the enforcement of the existing Immigration Act, and the regulations thereunder, during the past two years has done more to discourage immigration and colonization than to encourage it. So far as Great Britain is concerned, our excessive regulations and unwarranted deportations have created a general feeling that we in Canada have closed the door and do not want British colonists.

"We have, under our existing law and regulations, a provision for the deportation of colonists who do not come to Canada on a so-called "non continuous journey." The enforcement of this regulation has resulted in the deportation of many desirable colonists, and, if followed to its logical conclusion, the regulation to-day can be utilized to refuse admission to Canada to any desirable colonist due to the absurd fact that he did not happen to start on his journey from the country of his nationality —and the application of this regulation will be realized by you when I say that of the deported immigrants handled by the Canadian Pacific ships during the last year, 20% were deported on the ground of non-continuous journey, irrespective entirely, apparently, of whether they were the character of colonists we wanted or whether they would have made good citizens.

COL. J. S. DENNIS,
Chief Commissioner C. P. R. Department of Colonization and Development.

"In considering the question of development, I would direct your attention to the fact that Nature has blessed us in Canada with resources of agricultural land, timber, minerals and other things which, potentially, are ample security for our vast National debt, but the possibility of taking care of and discharging that debt is entirely dependent upon our development policy. These resources, undeveloped, are of no value, and, without men and women, cannot be developed.

"I admit frankly, that, particularly, in Western Canada and in certain of our older provinces, recolonization of our unoccupied farms and agricultural development are the main factors in the problem we are discussing. But let me point out the following facts to you.

"Taking the railway traffic of Canada as an indication of wealth resulting from development. In 1920, the products of mines provided 35% of the railway tonnage, the products of the forests 18%, while agricultural products provided only 17%. It is true that these figures indicate the necessity for increasing our agricultural production, but, at the same time they point out the existing importance of the extension and further development of the products of our mines and forests, and the important part that that development will play in aiding the solution of our railway problem and in adding materially to the general welfare of Canada.

Policy Non-Political

"In conclusion I desire to affirm that the problems I am outlining are non-political, and that a policy for their solution must be developed on broad lines and with the assistance of all interests and must include, more or less, an open door, and the establishment of a well-considered, thoroughly staffed and well-administered world-wide organization to make our principles known and to ensure that we shall, through the medium of colonization and development begin now, and carry on for many years, an aggressive and progressive policy for colonization and development, through the medium of men and money, of the natural resources with which Nature has so bountifully blessed Canada."

Jackson Made Up His Mind, Then Acted At Once, He Declares

"Tanlac has certainly backed up its reputation in my case," said Ernest Jackson, Greenwalde, Man., dental student in Winnipeg.

"I suffered from stomach trouble for two years and in spite of all the treatments and medicines I took I got worse all the time. My stomach was as sour as vinegar. I bloated terribly with gas and was so nauseated I could scarcely retain a thing of the little I ate. I had pains across my back too until it seemed like it would break.

"I made up my mind Tanlac was worth at least a trial, went ahead and took it, and began picking up right away. I kept on improving until now I feel as fine as I ever did in my life. I'm thankful a thousand times over for what Tanlac has done for me."

Tanlac is sold by all good druggists.

The Canadian Budget

During the Great War and in the years since, men responsible for the administration of national finances the world over have been confronted with great difficulty in balancing their annual budgets. They have had to overcome obstacles of all kinds. War expenditures had resulted in piling up national debts to unprecedented heights, the interest charges on which alone called for enormous sums annually. Pensions, care of disabled soldiers, re-establishment of soldiers, call for further large sums each year. During the war years ordinary expenditures on capital account were discontinued, and with the close of the war many services were found to have deteriorated and called for large sums of money to make good the previous years' enforced neglect.

Larger revenues had, therefore, to be obtained and there was only one way to get the money—by increasing taxation. But taxation had to be imposed in such a way as to interefere as little as possible with business during the difficult period of re-adjustment from a war to a peace basis when the whole world was engaged in the task of reconstruction, when hundreds of thousands of people were ruined, and with unemployment of millions of men and women. Governments only exist by will of the people, and it always has to be recognized that there is a limit which any people will stand in the matter of taxation.

The problem facing finance ministers has been to raise the larger revenues needed without at the same time doing irreparable injury to the business interests of the country and thereby, in the final analysis, creating an even worse and more difficulty situation.

British Chancellors of the Exchequer went further than those of other countries in imposing heavy, even drastic, taxation. They proceeded to impose such taxation upon everybody, but more particularly upon the wealthier classes. The result has been that, for some years past, Great Britain has been steadily reducing its war debt, and in the last British budget it was possible, owing to drastic cuts in national expenditures and as a result of naval disarmament to a marked extent, to announce a beginning in reduction of taxation. In the United States, too, there has been a reduction in the national debt since the close of the war.

In Canada, on the other hand, the enormous debt created by the war, instead of being reduced in the years since the Armistice, has gone on steadily increasing. This has been due to the fact that the national revenues have failed to meet the extraordinary charges for interest on the debt, pensions, re-establishment of soldiers, and the heavy deficits on the national railways. The time had come when a halt had to be called to further increases in the debt unless it was to become a monster which would finally bring the Dominion to bankruptcy. Reduction in expenditures had to be insisted upon, and heavier taxation had to be imposed, but imposed in such a way as not to seriously interfere with business and the development of the country.

Hon. W. S. Fielding in his first budget since again assuming the office of finance minister appears to have taken a leaf out of the books of British ministers. Reductions in expenditure in many departments of government were noted in the Estimates, and even these were further reduced in the Commons, notably in the militia and naval departments. The budget now announces the imposition of increased taxation. There are certain reductions in Customs duties, principally by way of increases in the British preferential tariff, and there is a removal of a number of restrictions to trade which should prove beneficial all round, but from a revenue standpoint these reductions are more than offset by increased taxation in other ways.

It is in the form of raising this additional revenue that Mr. Fielding is following the example of British ministers. The much needed new revenue is to come from heavier taxation on luxuries, and upon transactions carried through by men and corporations of larger means and wealth. There are increased taxes imposed on liquors, both intoxicating and known as soft drinks, on the higher priced cigars and cigarettes, on automobiles, on bank cheques, telegrams and cablegrams, on the note circulation of banks, and through an increased sales tax. In other words, those people in the Dominion who are best able to pay are to be required to do so.

Of course, there will be criticism from all these quarters, and already associations representing this and that particular interest are demanding reconsideration by the Government of this and that tax. It must be recognized, however, that the Federal Government must obtain larger revenues. Canada dare not go on adding additional millions to the national debt every year. To do so would be to commit national suicide, because it would not be long before an ever-mounting debt would eat up the entire revenue in interest charges alone.

That being the case, it follows that those who can afford to indulge in luxuries, or who are in a position to issue large cheques where the average man issues only small ones or none at all, should be called upon to pay. It is the system which has helped Great Britain through the hard years following the war. It is the system that should be given a fair trial by Canada.

Standing Timber on Vancouver Island

Speaking before the Vancouver Island Association Boards of Trade, E. W. Neel estimated the standing timber of Vancouver Island at 116,000,000,000 feet. In that portion of the island which includes the Esquimalt and Nanaimo Railway belt, the Renfrew district and Barkley Sound drainage basin, there are estimated to be 30 billion feet of Douglas fir and 13 billion b.m. feet of red cedar.

DO WOMEN WORK AS HARD AS MEN?

Yes. And They Must Keep Well and Strong

Two Interesting Letters

Toronto, Ontario.—"When my husband was called back to England in 1914 I took Lydia E. Pinkham's Vegetable Compound to strengthen me so I could work. I had a trouble that used to make me weak, but I am able to do my work now and am perfectly satisfied with your medicine. I still get it at the chemist's and I strongly recommend it to anybody I hear of suffering as I did. You may publish this if you wish."—MRS. E. HORNBLOWER, 899 Yonge St., Toronto, Ontario.

I Did Not Feel Like Working

"I was in a general run-down condition with a weak back and a tired feeling so that I did not feel like working. My mother was taking Lydia E. Pinkham's Vegetable Compound and recommended it to me, so I have taken it and my back is better and I am now able to do my work. I recommend the Vegetable Compound to my neighbors and you may publish my letter."—MRS. JOSEPHAT A. GRENIER, Box 47, Carbon, Alberta.

Lydia E. Pinkham's Vegetable Compound should be taken when you first notice such symptoms as nervousness, backache, weakness and irregularity. It will help you and prevent more serious trouble. Give it a fair trial.

Sentenced to Death
No Appeal Possible

The death warrant is passed out every time a corn is treated with Putnam's Corn Extractor. It means the end of the corn. Putnam's lifts out corns root and branch, and never fails. Refuse any substitute for Putnam's. 25c everywhere.

Livestock Prices Reviewed

Big Drop in the Prices of Livestock During Past Two Years

The drop that has taken place in the prices of livestock during the past two years is vividly illustrated by the Dominion Livestock Branch reports of the average prices for the month of April, this year, and in 1921 and 1920. It is not necessary to go any further than Toronto to realize this and, therefore, the prices of that market are referred to, accompanied by the remark that a similar state of affairs was shown in Montreal and elsewhere. In Toronto the average price for good steers in 1920 was $13.62, as against $7.70 this year; for heifers, $12.95, against $7.51; for cows, $10.75, against $5.73; for bulls, $10.55, against $4.84; for calves $16.45 against $7.26; for hogs $20.15, against $13.43; for lambs, $18.65, against $13.55; and for sheep, $10.73, against $6.50.

Seal Catch Increased 20 Per Cent.

The Newfoundland sealing season has closed with the arrival back in port of the sealers Ranger and Thetis, the last of the fleet to return from the sealing grounds. The total catch this year was about 126,096 pelts valued at about $200,000, approximately twenty per cent. greater than that of last year.

Marble is chalk, changed and crystallized by the internal heat of the earth.

Ask for Minard's and take no other

WORLD HAPPENINGS BRIEFLY TOLD

Americans constitute practically one-half of the 16,774 immigrants who have entered Canada this year. The total is made up of the following: British, 4,528; United States, 8,019; other countries, 4,227.

The steamer Abron from Alexandria, entered Boston harbor without a pilot, by means of radio bearings and soundings only Captain Powell reported that the innovation was successful.

A. L. C. Atkinson, Vermillion, Alta., has been awarded first prize for mathematics and mechanics, according to the results in the faculty of applied science at McGill University.

It is understood that the Morgan group, with which certain British bankers are associated, shortly will send representatives to Vienna to study the Austrian financial system with a view to ascertaining whether there is any basis for a loan to aid Austria's reconstruction.

Urged by Lieut.-Col. C. J. Williams of the Navy League, and Sam Harris, President of the Ontario Division of the League to take action Toronto City Council endorsed the protest of the Navy League against the proposed curtailment of the Canadian navy.

The Canadian Pacific Railway Company has transferred to the Federal Government the 50,000 acres of coal lands referred to in the Crow's Nest Pass Subsidy Act of 1897. The transfer was made on September 14, 1905, and the certificate of title was issued on November 27 of the same year.

HALIFAX EXPLOSION
WRECKED HER NERVES

The reader will, no doubt, remember when a few years ago there was a collision in the Halifax, N.S., Harbor and one of the munition ships was blown up, causing great loss of life and laying a large portion of the city in ruins, and causing a great deal of suffering and distress among the inhabitants.

Mrs. Winfield Dill, now of Windsor, N.S., was living in Halifax at that time and went through this trying experience and the shock wrecked her nerves. She writes as follows:—"I was living in Halifax at the time of the explosion, and it wrecked my nerves so that I could not do my housework. I would take such nervous spells I would be under the doctor's care.

I saw Milburn's Heart and Nerve Pills advertised, so I took two boxes, and they helped me so much I took six more, and now I am completely relieved. I can recommend them to anyone suffering from heart and nerve trouble."

To all those who suffer from nervous shock we would recommend our

MILBURN'S HEART AND NERVE PILLS

as the best remedy to tone up the entire nervous system and strengthen the weakened organs. Milburn's Heart and Nerve Pills are the original heart and nerve food having been on the market for the past 27 years. Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Fur Sales Total Over Million

Total sales approximating a million and a half dollars were reported by the Canadian Fur Auction Sales Company at the conclusion of the three days' fur auction at Montreal. A record attendance of buyers marked the sales, these being present from coast to coast in Canada, from every important fur centre in the United States, whilst many English and French firms were represented. A total of 2,225 lots of furs were disposed of in twenty-four hours selling time. The fall sale will commence on September 12th.

Tax on Checks Costs Montreal $20,000

The new stamp tax on checks will cost the city of Montreal $20,000 a year, according to an estimate prepared by P. Collins, assistant city treasurer.

Cuts, and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Discover New Uses For Ultra-Violet Rays

Method Found of Analyzing Drugs, Paper and Linen

Remarkable new uses are being found for the ultra-violet rays which have already been employed for ripening fruit, increasing plant growth, and for sterilizing milk and drinking water.

The rays are invisible, but they possess the power of making certain substances glow in the dark. At a recent demonstration in London a powerful beam of ultra-violet rays was thrown in a darkened room upon the audience, who discovered that their teeth glowed with a blue fluorescent light—false teeth showed as black—and the finger nails and eyes glowed as well.

Many new properties of the rays are being studied. In one case a method has been discovered of producing synthetic formalin and sugar by their action on water and carbonic acid, while an entirely new method of analyzing rare drugs, and more particularly different samples of paper and linen, consists of photographing the fluorescent light set up in the various substances under the influence of the ultra-violet rays.

Tour In India Was Great Strain

Too Long and Ambitious for Prince of Wales

Letters from various quarters in India, dealing with the tour of the Prince of Wales, all agreed that the strain of the tour has affected the health of the Prince, and that when he left India he was perilously near a nervous breakdown. The tour was really too long and ambitious, and the political situation was an additional complication which must have added to the strain. The Prince, moreover, with his restless energy and his insatiable desire for exercise, imposed a further strain on himself and did not allow for the effect of the Indian climate on his physique. He is now en route home. A quiet voyage should restore him to full health again.

B.C. Receives Settlement Inquiries

Under the scheme for the reduction of the Indian Army about two thousand war-time subalterns and captains will receive fairly substantial gratuities and other compensation according to their rank in the service, as well as being granted free passages for themselves and families to any British Empire port. The India Office has directed settlement inquiries to the Dominion and Colonial authorities and the Canadian Superintendent of Immigration urged the advantages of British Columbia, whilst the Agent-General for that province recommended a project in the Okanagan Valley. Officers from British Columbia are in India to advance the scheme.

Radio Company Organized

Organization of the Western Canada Radio Co., Ltd., in Winnipeg, with a capital of $5,000,000, is announced. The aims of the company are said to be the obtaining of patents and rights, development and operation of general radio business, and manufacturing and installing of receiving outfits throughout the Dominion.

The Queensland shipyards of Walkers, Ltd., have completed building their second 6,000 ton steel steamship for the Commonwealth Government line.

THIN BLOODED PEOPLE

Need a Tonic to Enrich the Blood and Restore the Health.

Some people have a tendency to become thin-blooded, just as others have an inherited tendency to rheumatism, or to nervous disorders. The condition in which the blood becomes so thin that the whole body suffers, comes on so gradually that anyone with a natural disposition in that direction should watch the symptoms carefully. Bloodlessness, or anaemia, as the medical term is, can be corrected more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome, the complexion becomes pale and breathlessness on slight exertion, such as going up stairs, is noticed.

Dr. Williams' Pink Pills are a home remedy that has been most successful in the treatment of troubles due to thin blood. With pure air and good food these blood-enriching pills are the correct treatment when the symptoms described are noticed. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. M. Chase, of Trenton, Ont., who says:—"I can highly recommend Dr. Williams' Pink Pills to all who suffer from anaemia and nervous exhaustion. For three years I was nearly always troubled with headaches, and until I began taking these pills no treatment seemed to do more than give me temporary relief. I had read of what Dr. Williams' Pink Pills were doing for others and finally decided to try them myself. I further decided to give them a fair trial and kept on taking them regularly for several months and I am glad to say have derived permanent relief. I feel that I can safely and honestly recommend this wonderful medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail, at 50c a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Denmark's kings have been called either Christian or Frederick for over 400 years.

The Arabs started enslavement of the negroes.

Smallest Gold Coin

Minted at Geneva, Weighs Less Than Postage Stamp

The smallest gold coin in the world has just been minted at Geneva for the use of the League of Nations. Though called a franc, it has nothing in common with the familiar French coin, being worth only about one penny in British money. It is octagonal in shape, and on one side are engraved the initials "S.D.N."—Societe des Nations. So tiny is the coin, however, that the letters can be read only by the aid of a powerful magnifying glass, while its weight is less than that of an ordinary postage stamp. The gold franc is not intended for general circulation. It represents the unit of universal value in which the forthcoming budget of the League of Nations is to be calculated. Its actual weight is given officially as .03225805 of a gramme.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

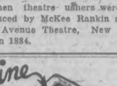
Success and Failure

Men Who Get Along Will Not Stay Down

The difference between the genius and the ordinary man is not that the genius never falls down, but that he won't stay down. He always gets up again. The difference between success and failure in life lies just there. Success depends upon our ability to get up when we are down. It's the comeback that counts. In other words the quitter gets nowhere. That rich neighbor of yours, that successful man, has had and still has, his financial reverses. He doesn't talk about them, for he knows that nothing succeeds like success, so he advertises his successes to his friends, his enemies, even to himself. He ignores his failures.

Somebody, a few days ago said, "the man who sticks never gets stuck."

Women theatre ushers were first introduced by McKee Rankin at the Third Avenue Theatre, New York City, in 1884.



Genuine

BAYER

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Will Publish Information Regarding Copper Eskimos Of Coronation Gulf Area

Curious stories of strange people dwelling in the Canadian Northland abound in Volume XII. of official reports on the Canadian Arctic expedition 1913-18. The volume which will shortly be issued, is the work of Dr. Jenness, ethnologist with the southern party of the expedition. It deals with the little-known Copper Eskimos of Coronation Gulf. It tells of their life, their language and their religious beliefs, of their dwellings, their dance halls (built of snow blocks), their food, how they marry and are given in marriage, of their amusements, their psychology and morality, of the mysterious influence of the Shaman—"the mediator and intercessor between the living Eskimos and the supernatural world of shades and spirits."

There have been various explorations of the Copper Eskimos' country since Samuel Hearne travelled overland with a party of Chipewyan Indians to the mouth of the Coppermine River in 1771. Sir John Franklin visited them thirty years later. But it was not till 1916 that the Copper Eskimo first came into conflict with civilized law. Then a Northwest Mounted Police patrol visited the Eskimos and arrested the murderers of two Catholic missionaries who were tried in Edmonton and Calgary.

The report, which is exhaustive, closes with words of warning. It observes that rapid changes are taking place in the culture of the natives. Implements of iron and steel; rifles, fish nets, open boats, European textiles and sewing machines, European foods, cheap musical instruments and the development of trapping at the expense of hunting and sealing will effect a complete transformation in the course of a few years. "Already," says Mr. Jenness, "the new culture elements and new culture teaching that are filtering from the west have profoundly modified their social and religious ideas, and before the present generation passes away, the primitiveness of the Copper Eskimo will have ceased to exist. How many will remain by that time, and whether they will be able to take part in the development of the region depends largely on the manner in which we fulfill our trust. For in throwing open their country to outside invasion we have incurred a heavy responsibility towards the natives. We may increase the security of life among them by checking infanticide and murder, we may protect them from unscrupulous exploitation and from the ravages of intoxicating liquors, but all this will be of little avail unless we immediately take measures to secure them against the introduction of our diseases. The epidemic influenza in 1918 exacted a terrible toll among the Eskimos of Northern Alaska, several settlements being practically wiped out. The Copper Eskimo have no diseases of their own, or at least none were known up to 1916; but white men and Western Eskimos are flocking into their country, and in a few more years perhaps they will fall victims to some of the scourges of our civilization. It may be impossible to prevent this calamity entirely, but at least we could do something by checking a kind of quarantine such as the Danes have done for Greenland. At the present time, the only practicable route into the Copper Eskimo country is by way of the Mackenzie River, and if no one were allowed to go eastward without a certificate from a medical officer it might be possible to save these natives from the worst of our diseases and a more or less speedy extinction."

Hungary Will Fulfill Obligations

Agrees to Deliver Cattle Under Peace Treaty Terms

The threat of coercive measures has brought Hungary to terms in the matter of delivery of cattle under the reparation terms of the peace treaty. The Hungarian Minister in Paris has notified the Reparation Commission that his Government promises to fulfill its obligations without further delay.

The commission has accordingly advised the Allied Governments to suspend action against Hungary. May 10 was the latest date allowed Hungary for delivery of the first instalment of livestock.

Auto Licenses Pay Police Expenses

On the authority of Commissioner Rattray it is stated that the operating expenses of the Manitoba police department will be paid for this year from the additional recenue from automobile licenses. Under the new regulations every provincial police detachment sells license direct to car owners without having to apply to the Provincial Government, and the revenue per day is being collected by the provincial officers.

Had Your Iron Today?

Let's Have Raisin Bread Tonight

HOW long since you've had delicious raisin bread—since you've tasted that incomparable flavor?

Serve a loaf tonight. No need to bake it.

Just telephone your grocer or a bakery. Say you want "full-fruited bread — generously filled with luscious, seeded, Sun-Maid Raisins."

The flavor of these raisins permeates the loaf. A cake-like daintiness makes every slice a treat.

Serve it plain at dinner or as a tasty, fruited breakfast toast.

Make delicious bread pudding with left-over slices.

Use it all. You need not waste a crumb.

Raisin bread is luscious, energizing, iron-food. So it's both good and good for you.

Serve it at least twice a week. Start this good habit in your home today,

But don't take any but a real, *full-fruited genuine* raisin bread.

Your dealer will supply it if you insist.

Was a Hopeless Case

The College Professor Who Could Not Be Cured of the Betting Evil

A young but exceptionally brilliant professor in a western college was dismissed from the faculty because of his inordinate betting. The president, interested in his career, secured him a position in an eastern college. To the president there he wrote: "The young man has a promising future, and anything you can do to cure him of betting will be a benefit to society."

The professor went east, and was cordially received. Conversation had proceeded but a few minutes when he said to the president, "I'll bet you seventy-five dollars you have a wart between your shoulder blades."

The president hesitated. "Young man," he said, "I never bet; but just to teach you a lesson I will take you up."

He thereupon proved to the young man's satisfaction that he was in error, and the professor paid the seventy-five.

The president wrote west relating the incident, concluding—"I hope that I have cured him."

The other wrote back "I fear the case is hopeless. The very day he left here he bet me one hundred dollars that he could make you take off your shirt."

Head Hunters of India

Prince of Wales Saw Strange Collection in Singapore

The Prince of Wales visited Singapore in the Malay States on his way home from India.

Driving up to the Government House he passed what our correspondent calls the strangest collection of head-hunters, pirates and savages that were ever lined up. . . . From British North Borneo came men armed with parangs hilted with carved ivory, and plumed, each one, with human hair; and their chests and backs protected by armour of python scale or clouded leopard, or mere goat or fish skin, with scales as big as those of tarpon. . . . Dyaks were there, naked for the fight save for loin-cloth and garters of horse hair and hammered brass wire, but ready for any man behind their curved and arabesqued shields and tufted spears. Many of the men bore traces of feudal strife, and nearly all were heavily tattooed. In the midst of this untutored barbarism stood a group of about twenty women, charmingly attired in scanty bands of russet silk weighted with gold."

The young lady, instead of a fan, carried the brightly decorated skull of an enemy who had been put out of the way. Curious tastes in ornaments these Dyak ladies!

Holdings and Exports Of Butter and Cheese

Holdings of Dairy Products Show Marked Decrease

Statistics furnished in the Dairy News Letter issued by the Dominion Dairy and Cold Storage Branch show that the holdings on April 1 of this year in all Canada were: Of creamery butter 2,226,157 lbs., against 2,396,123 on the same date last year; of dairy butter 193,864 lbs., against 455,169 lbs.; of cheese 4,330,400 lbs., against 1,143,252 lbs.; and of oleomargarine 164,285 lbs., against 305,360 lbs.

The same News Letter shows that in the first three months of this year the United Kingdom imported from Canada 61,205 cwt. of cheese as compared with 513,831 cwt. from New Zealand. The latter country's export of butter to Great Britain had more than doubled the first three months of this year over the same period of last year. Australia also shows considerable increase in exports both of butter and cheese.

Collecting Debts

When a man owes you a large debt—so large that he is wondering whether he can ever pay it—there are two ways of handling him. One is to leave him sweating on the Anxious Seat. The other is to fetch him into the private office, cheer him up, tell him you know he is honest and industrious and will pull out of this pinch all right in the end, and you mean to give him all the help you can. Waiving considerations of humanity or good-breeding, the second method is by far the more expedient if you hope to get your money back.—Boston Globe.

Exchange in Europe

Humorous as well as remarkable are some of the stories of the fluctuating rates of exchange in European money.

An Englishman on his way from Germany to Switzerland bought a bottle of wine for 500 crowns in the Austrian Tyrol. After drinking the wine he kept the bottle, and on crossing the Swiss border, sold it for fifty centimes. A Swiss fifty-centime piece is worth 700 Austrian crowns, so that the Englishman not only got his wine for nothing, but made 200 crowns.

Britain Coming Back Strong

Is Making Sure Recovery from Effects of War

H. W. Sturdley, the new vice-president of the Chamber of Commerce, Stratford, Ont., who had just returned from England and the continent, spoke briefly on conditions as he found them overseas.

"There is only one place in the old country where people are dying to live," said Mr. Sturdley, "and that's Ireland. The Scotch have lost none of their native wit and aggressiveness. The war has not decimated or weakened them.

"Britain is coming back strong," said Mr. Sturdley. "I am glad there is deep water between the British Isles and the continent. Something desperate may happen on the continent, but the English, Scotch, Irish and Welsh are coming back to their own. In six months I think you will see John Bull, on the job again all over the world just like he was before the war."

"The workers and employers are getting together. While there are still lots of conferences and arguments the necessity of getting down to work is realized and in six months Britain will show the world that she is not dead yet." Mr. Sturdley stated that Britain could easily spare ten million of her population who could be desirable immigrants for Canada to secure.

Will Allow Tall Buildings

London's Skyline is to be Raised Twenty Feet

Opposition of the city authorities of London to the erection of tall buildings now seems to have ended, or rather is rapidly passing. Convinced that tall buildings are safe and a commercial advantage, the London County Council, which holds the power to regulate things in the English capital, has decided to allow structures of large area to be built 80 feet high. This is twenty feet higher than the maximum height now permitted. The decision is the result of a report made by a commission appointed by the Council to study the question of taller buildings in London. The commission reported in favor of greater height. Every progressive city in the world has skyscrapers.

Although the commission reported favorably and the council thought that London should be allowed more than 60 feet building height, the fire brigade was consulted. The head of the fire-fighting force said that the extra height would not interfere with the efficiency of his force.

With everyone favorable to taller buildings, it now seems certain that London's skyline will be lifted higher than it has ever been before.

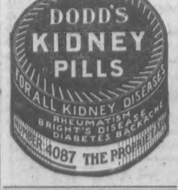
Quick Action

"Tobe, I'm sorry to hear your wife has left you and gotten a divorce."

"Yessum. She done gone back to Alabama."

"Who will do my washing now?"

"Well, Mum, I'se co'ting again, and I co'tes rapid."—Sent in by A. A. Wadden, Houston, B.C.



Diversified Cropping Systems Remove Many Obstacles In Western Dry Sections

Diversified cropping systems and a close study of climatic and soil conditions in selection of crops and cultural methods was strongly emphasized as the important feature in crop production by Prof. G. H. Cutler, University of Alberta, in an address before the Edmonton Board of Trade.

The speaker declared that there were almost unlimited possibilities in field crop production in the province, but with the wide variation in moisture supply, nature of the soil, etc., the system of farming employed to get the greatest crop returns must necessarily coincide with the existing conditions.

Although moisture was a limiting factor, the speaker emphasized that suitable cropping systems was removing some of the obstacles in some of the drier sections. Where wheat and other cereal crops fail or partly fail because of too early or too late rains, the farmers could then fall back on crops that do not suffer from these conditions. Such crops were winter rye, winter wheat and where conditions were suitable such crops as clover, millet and sunflowers, which to a certain extent could utilize moisture that is quite as likely to come out of season as in season. The system, the speaker contended, must be adapted to the conditions and not the conditions to the system.

Speaking of summerfallow, the speaker pointed out, that while it has its faults, it still was a most important factor in the dry areas, but its results pointed to a reduction of returns, soil drifting and land ruin. As evidence of this statement, the speaker pointed out that thousands of acres had been lost and are being lost by soil drifting as a result of intensive cultivation and the one crop system farming including summerfallow. Figures given indicated that as a result of 23 years of this single crop farming including 14 crops and 9 summerfallows, had depleted the soil of one-third of the nitrogen content by actual test.

There was no alternative for summerfallowing. It conserves moisture and moisture is essential, but it is advisable to put back the humus. Less excessive fallowing, and a thin cover crop of oats, rape or winter rye on the fallow was suggested. In extreme cases to plow in a green manure crop may have to be resorted to.

Legume crops, the speaker pointed out would help to keep up the nitrogen supply.

Opera in Odessa Well Patronized

Many People Attend While Others Starve in Streets

It costs 25 cents, the price of two pounds of bread, for an entire loge at the Odessa opera. The musicians wear gloves while playing their instruments to keep their fingers from freezing in the heatless halls, but the music is exceptionally good.

Long lines of scrawny people wait in line daily before food stations and many are to be seen lying in the streets too weak from hunger to solicit food, yet the opera house is well patronized. The bill at a performance witnessed by the correspondent was the Hugenots. The voices were good and the costumes—hang-overs from more prosperous days—were as good as many seen in American opera houses.

Several performances are given each week in a varied repertoire of Italian, German, Russian or purely local Ukraine operas.

Land for Reforestation

Simcoe County, Ontario, has formally inaugurated its reforestation policy by buying 1,000 acres of sandy land, unfit for agriculture, 10 miles north of Barrie, at a cost of $7,500. Six hundred thousand year-old seedlings of Scotch pine will be eventually planted. Of the young trees, about three years old, 30 acres will be set out this year and in the succeeding years 100 acres annually will be planted until the whole thousand acres are taken up.

Kept Money in Province

Total sales of British Columbia Government-assisted industries during 1921 amounted to $1,560,584, which sum represents the value of goods which otherwise would have been brought into British Columbia from outside and for which an equal amount of money would have been sent out.

Messrs. W. Campeau, E. Wallof, J. McClary and A. Allenback spent last weekend on a fishing trip to Lake Newell. They had a very successful outing, landing 68 pike, some weighing as high as 10 pounds.

Mrs. Learmonth's class gave a very successful and enjoyable piano recital in Mac's hall last Monday afternoon. Mrs. Learmonth has an exceptionally large class, and the way each performed his and her part at the recital reflects great credit on their teacher.

* * *

The grasshopper drive put on in town last Tuesday morning did good work. Although there were not as many men with pails as was expected, those who did turn out covered quite a territory and put out considerable poison.

* * *

A nice general rain passed over this district last Monday evening. There was also a good shower Tuesday afternoon, and another light one yesterday noon. During the past week there was considerable moisture, which will do much good.

* * *

Mr. H. Lister, field secretary for the Boy Scouts, was in town this week on business in connection with the Scout movement. As a result of this visit the local scouts will be better equipped tha never for next fall and winter work. Several new books and magazines will be added to the Scout library.

* * *

Nominations for school trustee to fill the vacancy caused by the retirement of J. Duggan, was held last Monday. There was evidently very little interest taken by the ratepayers, as no one was nominated. As a result there is still a vacancy on the Board. The Board will likely have to set another date for this purpose.

* * *

Since bills were printed announcing a grasshopper drive for Breezelawn for tonight, it has been found necessary to postpone the drive until Tuesday evening next. All donating cars are asked to have their loads ready to leave here at six o'clock sharp and go to A. Dubeau's farm, where everything will be in readiness for the drive.

* * *

A fairly good crowd attended the open air band concert last Sunday evening. The band put up an exceptionally good program, which was thoroughly enjoyed. These concerts show that the band is making excellent progress and that its members must be taking a keen interest in their practices. The band is an organization o which our citizens have reason to feel proud.

* * *

Neither the postponement nor the shower yesterday dampened the ardor and enthusiasm of the Gordon Memorial Sunday School scholars and officers for their annual picnic held in Hargrave's park, Medicine Hat yesterday afternoon. The weather improved as the afternoon advanced, so that it was possible to have a real pleasant outing. Teachers and officers of the Sunday School wish to thank all those who provided cars and otherwise helped to make the event a success.

* * *

Geo. Simpson, of Box Springs, is in the Medicine Hat hospital undergoing an operation.

* * *

A call is made for townspeople to help the Box Springs farmers with a grasshopper drive in that district next Sunday morning. Townspeople are expected to go to H. Baker's, from which place the drive will start.

Redistribution Will Give Ata 4 More Seats

Saskatchewan Entitled To Five More—In All 11 More In Prairie Provinces—Bill Will Be Brought In At Next Session in January.

There will be two hundred and forty-four members in the house of commons after the next redistribution, according to the revised population figures for Canada which have been given out by the Dominion bureau of statistics. This is an iscrease of nine members over the present house.

The distribution of the members among the provinces in the present house and after redistribution will compare as follows, on the basis of these figures:

Province	New House	Present House
Prince Edward Island	4	4
Quebec	65	65
Nova Scotia	14	16
New Brunswick	11	11
Ontario	81	82
Manitoba	17	15
Saskatchewan	21	16
Alberta	16	12
British Columbia	14	13
Yukon	1	1
Totals	244	235

The chief increase in membership are, as were expected, in the prairie provinces which will send eleven more members to parliament after redistribution than they do now. The decreases are in Nova Scotia and Ontario. The province which gets the largest increase is Saskatchewan with five, while Alberta is aa close second, wth four.

It is not certain whether the Yukon will retain its separate representation after redistribution. That territory was first given a member by act of parliament in 1902. Tt that time there was a population of 27,219 in the territory, but at present it is only 4,157.

According to an announcement made by the premier at the close of parliament, a redistribution bill will be introduced at the next session in January.

Rains which have fallen fairly generally over the province during the past few days have materially improved the situation with respect to crop conditions, and have saved the grain from actual drought in several districts. The feeling in the province at this date is one of optimism and the indications are for the harvesting of a very fair crop.

In some districts prior to these rains the grain had begun to burn, and in one or two sections farmers were actually plowing up crops. The rains of June 28 and 29, however, brought need moisture.

Precipitation during these rains totalled from one-third to an inch and one-third. The rains have been accompanied by cool weather.

The grasshopper menace is practically under control in all districts, and the loss will be very light from this cause, although farmers are urged to continue their efforts for the next few weeks.
